Software Products

Smart Content Management System

Creation and control of the information published to a website

Content Management covers the creation and control of the information published to a website. Whether this content is news items, product and service information or the actual site content itself, modern companies need to know that information is checked and approved prior to being made public.

Smart Recruitment Manager

Web based Recruitment Management Software

Smart Recruitment Manager is a highly configurable, scalable & user friendly web based Applicant Tracking System/ Recruitment Management System. It is user friendly, flexible to fix around your hiring process and continuous product advancements are made to the system.

Smart HR

Payroll and Time Attendance Software

Smart HR Manager significantly reduces the amount of time that your human resources department spends managing employee information. Reports in an instant showcases your staff's competencies. Alerts and Notifications are send on expiry of documents. It is user friendly, flexible to fix round your hr process and continuous product advancements are made to the system.

Smart Central

Task/Event/Job Management

As a project manager, you need to manage your team members and their activities to complete your project on time. Now you can easily assign tasks to your team members with priorities and due dates. Task Management will automatically notify your team members of new tasks, inform you of completed tasks and even send out reminders of past-due tasks. A complete reporting function allows you to monitor all phases of your project and get a competitive edge over your competition.

Smart CRM

Customer Relationship Management

Customer Relationship Management is an integrated approach to identifying, acquiring and retaining customers. The key features in SCS CRM application is:

- The ability to maintain information about a customer, all its interactions with an organization and then share that information throughout the organization.
- Managing the follow-up process to make sure that any additional communication or action with regard to a customer occurs in a timely fashion.
